Guaranteed.

Maine Forest PRICE LIST

EXPLANATION OF PRICE LIST

The figures 2-1, 2-2, 2-2-1, represent the number of years the trees have been in seed beds, number of years in transplant beds, and number of times transplanted. In every case the first figure indicates the number of years the trees remained in the seed bed before being transplanted. Each dash represents one transplanting. Each figure after the first one indicates the number of years the trees remained in the transplant bed. The total of the figures indicates the age of the tree. Thus, a 2-2-1 Engelmann Spruce is a 5-year-old tree which remained in the seed bed two years, was transplanted, and remained in the transplant bed two years, was then transplanted again, and remained in the transplant bed one year.

WEIGHT

There will be some variation in the weights estimated below due to the different varieties and the different types of soil in which the trees are grown. On an average the trees including packing material, and crates will weigh per thousand approximately as follows:—2 year seedlings, 7 lbs.; 3 year seedlings, 15 lbs.; 3 year transplants, 28 lbs.; 4 year transplants, 80 lbs.; 5 year transplants, 200 lbs.; 6 year transplants, 200 to 300 lbs.

TERMS

Cash with order, or one-half cash with order, balance C.O.D. All prices F.O.B. Fryeburg, Maine, net, no discounts.

Two hundred and fifty trees of any one kind and size at the thousand rate. For less than 250 of one kind, ask for retail price list.

No extra charge for boxes or packing. All orders shipped by express unless otherwise specified. Trees shipped by freight are not guaranteed to live.

PLANT CHRISTMAS TREES FOR PROFIT

Turn Pennies into Dollars While You Wait

It's easy to make a good income growing my Guaranteed-to-Live Christmas Trees.

Frankly, I don't know of any other crop that will give you such big returns for so small an investment of time and money. You can plant from 500 to 1000 trees in a day. From then until time to cut them for market, you needn't do another thing for them — unless you wish to prune them occasionally so they'll have the perfect shape that brings top prices. It's easy to turn a few unused acres into real income-producers. Compare the cash return from Christmas Trees with any other crop. I think you'll agree — Christmas Trees are the way to make farming pay! Of course, the sooner you set in your plantation of Evergreens, the sooner you'll have the cash return they bring.

The traditional favorites are Balsam and Douglas Fir, Norway and White Spruce. A newcomer in the market is the pine, which grows more popular each year. Scotch Pine is the favorite of the pine varieties due to the fact that it holds its needles longer than the spruces or firs. Its sturdy branches are especially suitable for bearing decorations. It thrives on stony, hilly land and flourishes in all climates.

Christmas trees can be grown on land ordinarily unprofitable for farming. In fact, any land that is well drained and free from large vegetation will grow Christmas trees. Waste land is wasted opportunity. And it's a wonderful feeling to realize that the old abandoned pasture or the unused fields are hard at work for you again — growing a crop which will mean cash at Christmastime.

GROWERS OF EVERGREEN TREES

Fryeburg, Maine

Fall Planting Time - 1948

Dear Friend and Tree Grower:

The enclosed folder features the largest and finest selection of Evergreens we've been able to offer since before the war.

Many long unavailable varieties are back in such abundance you can plant them freely again. During the war years, we ran into severe labor and seed shortages and were able to put only a small part of our total acreage into use.

Now we are getting ready to dig and ship over ONE MILLION young trees that have been in seed beds and transplant beds the past three, four, and five years.

These Western Maine Trees are among the hardiest I've ever seen at the nursery. All of them have been transplanted at least once to make them extra-hardy. They've all survived the biting frost of our Maine winters, and if the Trees live for us, they'll live and grow for you! That's why we can GUARANTEE these trees to live!

For nearly 25 years, we've been guaranteeing satisfaction. This is the only basis on which anyone can hope to conduct a successful business. Each year we put more seed to work at our nursery because customers want more and more of our Trees. Many growers place orders for 10,000 trees, and more, every year. Be sure to read the Guarantee in the folder. Here's maximum protection on your tree investment, plus more trees for your money.

Whatever use you want of these Trees - for reforestation, water sheds, or Christmas Tree plantings - Maine-grown Trees provide natural beauty and protection at a cost of only pennies a tree! In spite of current high costs, we've scaled our prices down to save you money and to bring commercial growers a good profit on their resale.

IMPORTANT: Even though we have more Trees than in the past, there is a limited supply of some varieties. So to be sure of getting the Trees you've been planning on, send in your order right away. Write in quantities and kinds on the enclosed Order Form and mail with remittance. Terms are cash with order, or one-half cash with order, balance C.O.D. All prices F.O.B. Fryeburg, Maine.

Sincerely yours,

Harry Eastman

WESTERN MAINE FOREST NURSERY CO.

Our Guarantee . . .

Ninety per cent of all trees sold at our regular prices as quoted in this price list (except seedlings) are guaranteed to live. If you will notify us before October 1, 1949 of the number over 10% which do not live, replacement will be made. Shipment will be made by express collect.

In other words, we guarantee that 90% of the trees you buy will live. We will ship you enough trees next fall so that the total you have will equal ninety per cent of the number you originally purchased. **SEEDLINGS ARE NOT GUARANTEED TO LIVE.** If we are unable to furnish replacements in the exact size which you purchased, we will furnish them in the nearest size. Trees shipped by freight or truck not guaranteed.

Price \$6.75—Order it with your trees.

Use this planting tool. We have used them for 25 years in all our work. One man can plant 1000 trees a day by using it.

TIME TO PLANT

Planting should be done during the time of year when the trees are not growing, which means from September first until the ground freezes in the fall, and from early spring until about the middle of May. We do not recommend the planting of forest trees on wet loam, or clay soil in the fall, (on this type of soil the action of the frost during the winter will throw the trees out of the ground). Fall planting on light, well drained, or sandy soil is very satisfactory.

WHAT TO PLANT

In general, pines for lumber, spruce for pulp, Larch for posts and poles, fir, spruce and Scotch pine for Christmas trees.

SPECIAL PLANTING TOOL

PRICE \$6.75 EACH

First man with trees in left hand and shovel in right is ready to make the hole. Second man is inserting shovel straight into the ground. Third man has inserted the shovel and has the handle pushed ahead, forming opening for tree back of shovel. Fourth man, while keeping shovel pushed ahead with his foot, has taken one tree from the bundle carried in his left hand and is putting it in hole. Fifth man has removed shovel and is closing opening by stamping each side of it with his heel. On cleared land such as shown in this picture, one trained man can easily plant 1,000 trees a day. Special planting tool for sale, \$6.75 each.
